

Video: Networking 101

Task #1:

Map your personal network:

- **Who is there?**

What type of people? Are there usually classmates? Are there people only from your city or country? Are there people from specific industries? Are there also mentors or coaches and people who can really get you going?

- **Who do you need to add?**

Who are you missing? What type of people you want to add to your network?

Task #2:

Make a plan:

- **What events can you attend this week?**

- **Who would you like to meet?**

- **And who can introduce you?**

- **What would help your career?**

A mentor, investor or somebody else?
